

The AOK- HausarztProgramm for children and young people.

More health benefits for your children.

GESUNDNAH

AOK Baden-Württemberg
Die Gesundheitskasse.

Hausarzt-
Programm

These are the best conditions to ensure the healthy development of children and young people.

As a health insurance company, providing your whole family with the best medical care is particularly important to us. That's why children and young people also benefit from the advantages of the AOK-HausarztProgramm with selected paediatricians.

Exclusive and free of charge

In concrete terms, this means that you can count on more comprehensive care for your child in all health-related matters. **This includes, among other things, a particularly thorough consultation and a number of supplemental medical check-ups.** And all of this is provided by doctors who, thanks to regular advanced training, are up to date with the latest medical knowledge. So it's worth registering your child for the AOK-HausarztProgramm as early as possible.

This is how you can find paediatricians who participate in the programme.

For you as parents, choosing the right doctor is an important decision – **and we would like to make it easier for you. Simply go to hausarzt-suche.de**

Of course, the AOK-KundenCenter (AOK customer centre) near you is also glad to be of assistance with any questions you may have about the AOK-HausarztProgramm.

The benefits at a glance.

- **More security through better care:**

With the U10, U11 and J2 supplemental check-ups as well as the enhanced testing procedures in the Paed.Plus® examination record booklet, possible developmental problems or illnesses can be detected and treated early on. The AOK-HausarztProgramm also includes free vision and hearing tests (amblyopia screening and tympanometry for small children)

- **More individualised treatment and consultation:**

The doctor takes plenty of time for your child – and for questions you as parents may have. And since the participating doctors complete important advanced training on a regular basis, they are always up to date with the latest medical knowledge

- **Reduced costs for medicines:**

The costs for pharmacy-only, non-prescription medicines are covered for children and young people aged between 12 and 17

- **Protecting the climate and health:**

Children are particularly affected by the health impacts of the climate crisis – for example, from heat or increased pollen levels. You can therefore seek advice on a lifestyle that protects your child's health and the climate at the same time

How it works:

- 1. Find out** which paediatricians in your area participate in the AOK-HausarztProgramm – from your AOK or at hausarzt-suche.de
- 2. Make an appointment** with a participating paediatrician and register your child for the AOK-HausarztProgramm
- 3. Enjoy the peace of mind** that comes with knowing that your child is receiving the best medical care with the AOK-Hausarzt-Programm
